

## SIDAC-S Non-Stabilized Power Supplies Based on Safety Isolating Transformers

**Unfiltered for supplying general loads:  
Three-phase**

### Overview

- Rated output voltage  $U_d$  DC 30-27-24 V
- Safety isolating transformer to EN 61558-2-6
- , 
- $t_a = 50$  °C/B
- Shield winding between input and output winding
- Varistor suppressor circuit
- Designed and approved according to VW equipment specification
- Ripple < 5 %.
